PROFILE

Full-stack Software Engineer with **5+ years of experience** designing, developing, testing and maintaining business-critical systems across automation, data-driven applications and enterprise integrations. Founder and lead developer of **Refilla**, an offline-first booth app and admin portal for LP gas retailers in Zimbabwe, and creator of **Terraform**, an AI-powered fitness app live on Google Play. Collaborates with cross-functional teams to deliver scalable, well-documented solutions in Python, PHP and JavaScript, improving reliability, performance and operational efficiency through cloud-based deployments.

PROFESSIONAL EXPERIENCE

Founder & Lead Developer | Refilla

2026 – Present

- Founded and lead development of Refilla, a booth app and admin portal that helps LP gas retailers in Zimbabwe track every kg sold, every shift and every dollar across all booths.
- Designed an offline-first Android booth app for low-cost phones: sales by kg or amount, shift cash-ups, deliveries and requests to head office, with automatic sync when signal returns.
- Built the multi-tenant admin portal with live sales and cash visibility, gas-loss alerts, centralised pricing and multi-currency (US$/ZWG) reporting aligned to ZERA and ZIMRA compliance.
- Own the product end to end: architecture, delivery, go-to-market and the 2027 pilot programme with LP gas companies in Harare.

Software Engineer | Cybernaptics

Mar 2025 – Present

- Designed, implemented and maintained end-to-end automation solutions, reviewing existing systems and enhancing workflows using modern integration and low-code platforms.
- Collaborated with business analysts, DevOps and QA teams to translate business requirements into reliable, maintainable technical solutions.
- Performed system analysis, testing and continuous improvement, ensuring solutions were sound, scalable and aligned with organisational objectives.

Software Developer | UNICAF University

Sept 2024 – Mar 2025

- Developed and maintained scalable software in PHP and Python, deploying and supporting systems on AWS with an emphasis on reliability and performance.
- Implemented and supported CI/CD pipelines with GitHub Actions, ensuring controlled deployments, versioning and consistent delivery across environments.
- Conducted research, system integration, testing and maintenance using Docker and Celery, collaborating on planning and delivery.

Software Engineer | National Dental Support

May 2024 – Jul 2024

- Designed and delivered API integrations and automated reporting solutions using Python and JavaScript to improve data flow and operational efficiency.
- Conducted exploratory data analysis, system validation and issue resolution to ensure accuracy and reliability of outputs.
- Supported implementation and user adoption through system testing, deployment support and client training.

Senior Software Engineer & Team Lead | Petalm Africa

Nov 2021 – Aug 2024

- Designed, developed, tested and maintained software systems aligned with business requirements across the full SDLC, producing clean, efficient code and well-structured architectures.
- Performed system analysis, code reviews, debugging and validation testing; automated manual processes while ensuring reliability, performance and maintainability.
- Collaborated with cross-functional teams to gather requirements, implement enhancements, document workflows and monitor production systems.

Web Developer | AquaGuard Engineering

Jul 2020 – Aug 2021

- Developed and deployed web applications using PHP and MySQL, improving client engagement and platform reliability.
- Maintained and enhanced existing systems, contributing to improved user experience and operational performance.

IT Intern | ZETDC

Aug 2019 – Aug 2020

- Supported IT infrastructure management and contributed to the implementation of an inventory management system.
- Assisted with hardware/software troubleshooting and provided technical support across internal teams.

SELECTED PROJECTS

- **Refilla:** LP gas booth app and admin portal for Zimbabwe: offline-first, multi-currency, compliance-ready. refillagas.com
- **Terraform:** AI-powered fitness training app with social features and real-time sessions. React Native/Expo, FastAPI, PostgreSQL. Live on Google Play.
- **Facial Recognition System:** Django and machine-learning application for identity verification and access control.
- **Gas Dispensary Management PWA:** Offline-capable PWA with real-time transaction tracking and automated reporting dashboards.
- **Medical Insurance ERP Integration:** Claims, compliance and reporting automation using Python and SnapLogic.
- **Workforce Automation Pipeline:** Python, Celery and Redis pipelines for workforce and payroll reporting.

EDUCATION & CERTIFICATIONS

Bachelor of Information Technology, Harare Institute of Technology, 2017 – 2021

Data Analysis with Python • SQL Certification • Data Warehouse Certification • JavaScript Algorithms & Data Structures

SKILLS

Languages: Python, PHP, JavaScript, Dart, Java, C

Frameworks: Django, FastAPI, Flask, Node.js, React, React Native, Expo, Next.js, Laravel, Flutter

Data & ML: PyTorch, TensorFlow, Scikit-learn, Pandas

DevOps & Cloud: Docker, GitHub Actions, AWS, Vercel, Huawei Cloud, Celery, Redis, PostgreSQL, SQLAlchemy

Integration: SnapLogic, NewgenOne, API development, system integration

Strengths: Leadership, mentorship, problem solving, critical thinking, adaptability, innovation
